TIME PERIODS FOR FILING A REPLY TO THIS NOTICE:

- Applicant is given **no new time period** if the non-compliant amendment is an after-final amendment or an amendment filed after allowance. If applicant wishes to resubmit the non-compliant after-final amendment with corrections, the **entire corrected amendment** must be resubmitted.
- Applicant is given **one month**, or thirty (30) days, whichever is longer, from the mail date of this notice to supply the correction, if the non-compliant amendment is one of the following: a preliminary amendment, a non-final amendment (including a submission for a request for continued examination (RCE) under 37 CFR 1.114), a supplemental amendment filed within a suspension period under 37 CFR 1.103(a) or (c), and an amendment filed in response to a *Quayle* action. If any of above boxes 1. to 4. are checked, the correction required is only the **corrected section** of the non-compliant amendment in compliance with 37 CFR 1.121.

Extensions of time are available under 37 CFR 1.136(a) only if the non-compliant amendment is a non-final amendment or an amendment filed in response to a *Quayle* action.

Abandonment of the application if the non-compliant amendment is a non-final amendment or an amendment filed in response to a *Quayle* action; or
Non-entry of the amendment if the non-compliant amendment is a preliminary amendment or supplemental amendment.

Notice of Non-Compliant Amendment (37 CFR 1.121)

Continuation of 1(c) Other: Marked-up copy filed 4/10/08 does not accurately reflect the changes made to the original specification and preliminary amendment. The marked-up copy must show all material added with underlining, and all material which is being deleted with strike-through or double bracketing. Numerous instances of text which were present in the original specification, and which were not deleted in the preliminary amendment, no longer appear in the substitute specification. The marked-up copy should show the changes which have been made. As an initial example: At the beginning of the specification, "Object of the Invention" has been changed to "Field of the Invention" but the preliminary amendment has not made this change and the marked-up copy does not show it either. This is one of a number of instances which can be noted from a cursory inspection of even a single page of the specification. 37 CFR 1.121 is very clear on the manner of making amendments in a specification, and the marked-up copy which has been submitted does not comply with the rules set forth in 37 CFR 1.121 .
